Re: **2016 PY CDBG - Roadway, Water Main & Sewer Improvements
14th Street/Highland Avenue/Harvey Avenue
Construction Update**

Dear Sir/Madam:

The City has awarded contracts for the repairs to the following sections of roadway:

- 14th Street from Lombard to Cuyler Avenue
- Highland from Roosevelt Road to 14th Street
- Harvey Avenue from Roosevelt Road to 14th Street

Water Main work will be completed on 14th Street by the Cerniglia Company of Melrose Park. The work will replace an old deteriorated water main with a new 8" water main that will improve the circulation of flows within the general area.

Roadway and sewer work on all three streets will be completed under a contract with M&J Asphalt Paving of Cicero, Illinois. Sections of broken sewer main will be replaced and sewer structures will be repaired. Small sections of defective curb and gutter will be replaced. Following the concrete work the asphalt pavement will have the surface removed and the pavement patching will be completed before the entire roadway has new asphalt placed. New pavement marking and landscape restoration for affected areas will be completed thereafter.

Work is scheduled to begin later this week and be completed by the end of day, September 29, 2017.

During construction there will be no parking on 14th Street and limited parking between the hours of 7 AM to 5 PM on Harvey and Highland Avenues. Your cooperation with the parking will assist the projects smooth operation and reduce the delays in the works progress. We know that at times construction can be frustrating; however, we want to lessen your disturbances as much as possible throughout the construction process. Upon review of this information or if at any time you have concerns about the project, please contact our office so that we may help resolve the issues as soon as possible.

We thank you in advance for your patience and understanding during the construction of these improvements. Upon completion of these improvements, the community will enjoy the improved roadway and watermain for years to come.

Very truly yours,

EDWIN HANCOCK ENGINEERING CO.
