Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

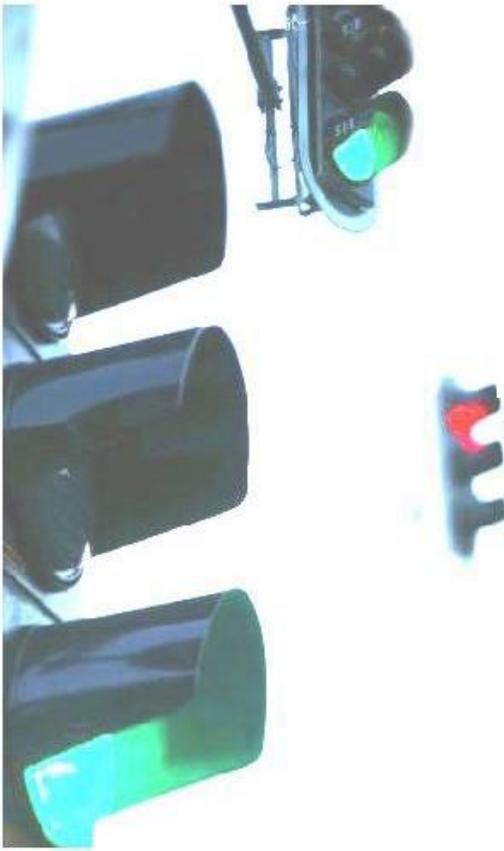

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

5. Report Summary and Recommendation

The long-term goal of RLR camera enforcement programs is to increase traffic safety by enforcing red light running ordinances in a consistent and transparent manner for a sustained period of time. The timing of the traffic signals at this intersection have not been altered, and should not be altered while the RLR camera system is in operation. In time, these cameras will become a part of the everyday lives of motorists living and working in this area.

The **City of Berwyn** uses state-of-the-art digital cameras provided by SafeSpeed, LLC to execute its RLR Enforcement Safety Program. The intersection of 22nd St and Harlem Ave was selected specifically for this program because of its high traffic volume and crash data. The citation and adjudication process administered by the **City of Berwyn** with assistance from SafeSpeed, LLC, was conducted in a courteous, professional and timely manner, in compliance with the RLR regulations laid out by the Illinois Department of Transportation District 1 Bureau of Traffic Operations.

In 2015, the **City of Berwyn** received approval from IDOT to install RLR cameras at the Westbound approach at the intersection of 22nd St and Harlem. The dates of the most relevant events are listed below:

- Date at which the justification report was submitted: **04/2013**, approved: **04/2014**
- Date at which the installation report was submitted: **06/2014**, approved: **10/2014**
- Date at which the permit and bond was submitted: **11/2014**, approved: **01/2015**
- Date at which cameras went live: **04/2015**

The Average Daily Traffic Count (ADTC) along 22nd St slightly decreased from 32,600 - 38,100 cars in 2013 to 30,100 - 35,500 in 2018. (See Tab 3)

In 2012, before the RLR installation, there was 27 total crashes, 26 in 2013 and 31 in 2014. In 2015, the year of installation, there were 36 total crashes. In 2016, one year after installation, there were 36 total crashes. (See Tab 2)

At this time, it's difficult to accurately determine the impact of the Westbound RLR camera at 22nd St and Harlem Ave in **Berwyn**. When modifications such as RLR cameras or traffic modernization are added to an intersection, initially it can cause slight disruptions to the normal driving behaviors and patterns of drivers. Additionally, two (2) other RLR cameras had been recently installed at the intersection of 22nd St and Harlem Ave in **North Riverside** (Southbound in 2014 and Eastbound in 2015). Therefore, with all the modifications at this intersection effecting drivers' behavior, it's necessary to look at a larger sample size of data to accurately determine the effectiveness of the recently added RLR camera.

It is very important to keep a close eye on the crash trends year after year. A merged follow-up report for RLR Cameras (Westbound and Northbound) at this intersection of 22nd St and Harlem Ave in **Berwyn** is recommended.

Since enhanced traffic safety is the principal aim of RLR camera enforcement programs, RLRC system should remain at this intersection as an integral part of the traffic system process which incorporates public education, enforcement and engineering.
