

**IL Rt. 43 (Harlem Ave) at  
Cermak Rd (22<sup>nd</sup> St)  
<Northbound>**

**RLR Crash Data  
and Analysis**

The table and chart below show the summary of Crash data at the intersection of Harlem Ave and Cermak Rd 3 years (2009 – 2011) prior to RLR camera installation as well as 1 year post period crash data (2012).

	Turning	Rear End	Angle	Other	Sideswipe	Total
<b>2009</b>	10	12	2	2	1	<b>27</b>
<b>2010</b>	11	2	4	6	1	<b>24</b>
<b>2011</b>	10	10	2	2	1	<b>25</b>
<b>2012</b>	14	9	4	0	0	<b>27</b>

According to the Average Daily Traffic (ADT) report from IDOT, Cermak Rd had 26,000 - 29,000 cars which pass through this intersection daily in 2010 and the traffic has significantly increased to 32,000 - 38,000 cars daily in 2013 resulting 23.07% - 31.03% increase.

However, the recent Crash Data showed no significant difference in the number of **Total accidents**. (27 in 2009, 24 in 2010, 25 in 2011 to 27 in 2012)

Also, according to 2012 crash data provided by IDOT, 58 vehicles were involved in 27 accidents. Out of 58 vehicles, 14 (24.1%) vehicles were heading Northbound where current RLR system is installed, 22 (37.9%) vehicles were heading Southbound, 8 (13.8%) vehicles were heading Eastbound and 9 (15.5%) vehicles were heading Westbound.

### Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

## Collision Diagram

1/1/2011 to 12/31/2011

Crash Route: IL043 | From MileStation 23.95 to 23.95 | County : Cook | Intersection Related: Intersections | \*See Notes at End of Report.

### Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

### Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

# Traffic Volume

## March 2010

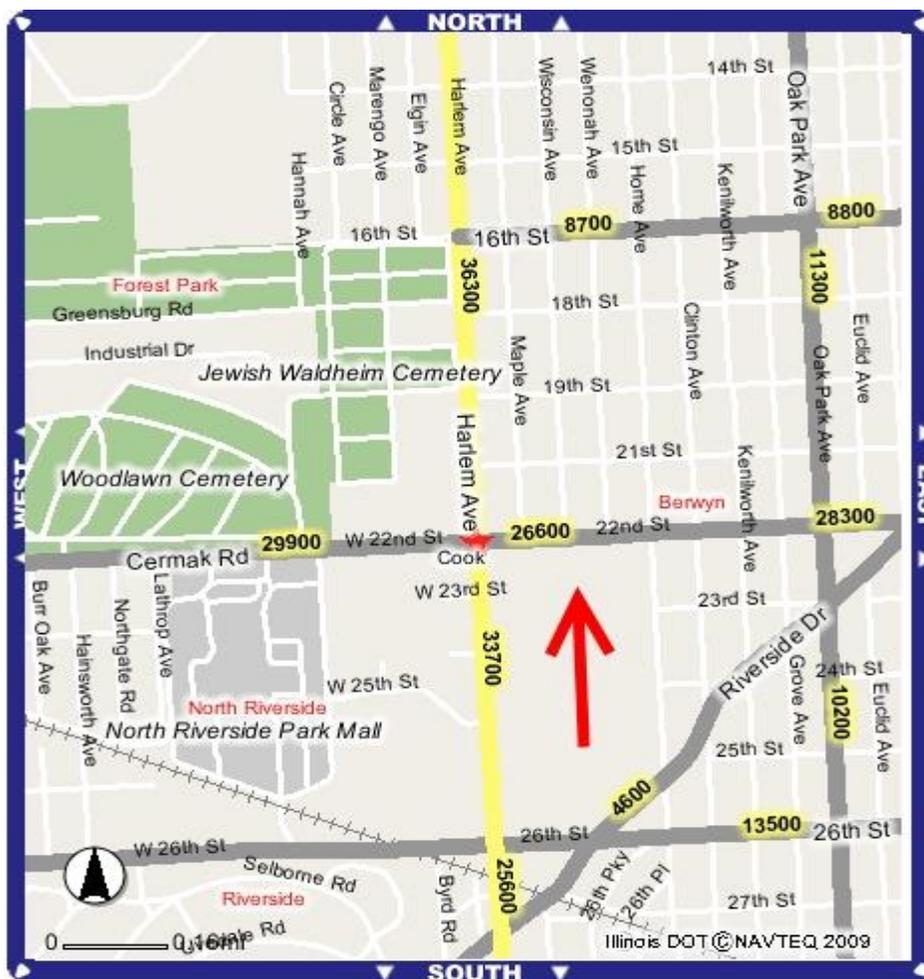

The traffic numbers below were obtained from the Illinois Department of Transportation website per the RLR Guideline document published by IDOT. Only ADT values were available, peak numbers were not provided.

### Harlem Ave ADT

- North of Cermak Rd is 36,300
- South of Cermak Rd is 33,700

### Cermak Rd ADT

- East of Harlem Ave is 26,600
- West of Harlem Ave is 29,900

## October 2013

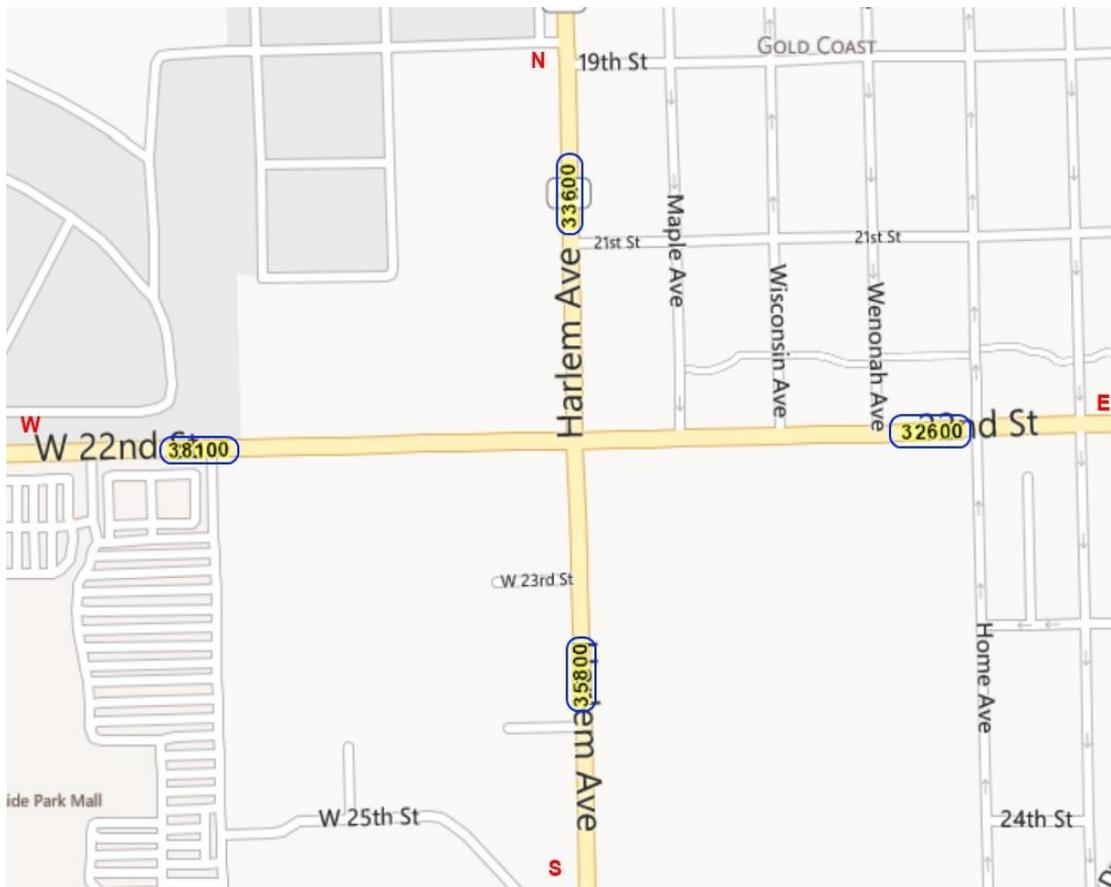

The traffic numbers below were obtained from the Illinois Department of Transportation website per the RLR Guideline document published by IDOT. Only ADT values were available, peak numbers were not provided.

### Harlem Ave ADT

- North of Cermak Rd is 33,600
- South of Cermak Rd is 35,800

### Cermak Rd ADT

- East of Harlem Ave is 32,600
- West of Harlem Ave is 38,100

# Summary

Red light running happens frequently and is often deadly. In 2011, 714 people were killed and an estimated 118,000 were injured in crashes that involved red light running. Red light cameras are an effective way to discourage red light running. Enforcement is the best way to get people to comply with any law, but it's impossible for police to be at every intersection. Cameras can fill the void. An institute study comparing large cities with red light cameras to those without found the devices reduced the fatal red light running crash rate by 24 percent and the rate of all types of fatal crashes at signalized intersections by 17 percent according to the Insurance Institute for Highway Safety. (<http://www.iihs.org/iihs/topics/t/red-light-running/topicoverview>)

Studies have reported that red light cameras reduce angle and turning crashes. Because the types of crashes prevented by red light cameras tend to be more severe than rear-end crashes, research has shown there has also been a reduction in the severity of crashes.

All processes are in compliance with the RLR regulations laid out by the Illinois Department of Transportation District 1 Bureau of Traffic Operations.

**The City of Berwyn** received approval to install RLR cameras at the intersection of Harlem Ave and Cermak Rd in 2011.

- Date of RLR camera implementation on Northbound: **6/10/2011**

There have been no Signal timing (or any other settings of Traffic Controller) changes.

The intersection of Harlem Ave and Cermak Rd is the one of the busiest and most dangerous intersections in Berwyn. According to the Average Daily Traffic (ADT) report from IDOT, Cermak Rd had 26,000 - 29,000 cars which pass through this intersection daily in 2010 and the traffic has significantly increased to 32,000 - 38,000 cars daily in 2013 resulting 23.07% - 31.03% increase while the total number of crashes (27 in 2009, 24 in 2010, 25 in 2011, 27 in 2012) did not increase proportionally.

We suggest given more time to monitor this intersection, we will be able to provide more compelling information in the years to come. We believe that the current RLR camera is effective and adding additional RLR cameras may enhance the traffic safety at this intersection.
