

## BNSF Switch Replacement 10/29—11/16

Parking Spot Usage and Fence Removal

BNSF will be replacing the switches near LaVergne station between 10/29 and 11/16. During this time the parking spots shown above in blue will be blocked off and used as a staging location for track equipment and materials. Parking spots shown above in yellow will be signed as temporary parking spots for any vehicle overflow as a result of the staging.

The dotted red line represents approximately 500' of wrought iron fence that will be removed for the installation. This fence will be cut at the base and re-welded at the finish of the switch replacement. 10 panels of fencing are being ordered in advance as a precaution.
